Subject, "Assignments/Scientific Advisor/OEL

13,D Considers the altitude of the aircraft in determining the intercept probability of ground radars. Using this information the minimum threat path for the aircraft can be plotted.

13,G Looks like a "shopping list."

13,I Indicates that there are programmers assigned to OEL. This is a fair amount of effort. Is OEL paying?

13,K I would like to see GSD and ASD. Both have a requirement for improving analysis, equipment and techniques.

Paragraph 14 - This constitutes the large number of approaches towards an undefined end. The undefined end is probably an ultimate analysis technique. This illustrates the need for a general statement regarding what is ultimately needed in the way of ELINT data. It may be that some of the techniques are really gilding the lilly.
